

eToken PASS

PRODUCT BRIEF

Benefits

- **Enhanced security** with two-factor authentication to networks, SaaS applications, and web-based services
- **Increased control over OTP security data** offered with field-programmable devices initialized at customer's premises
- **Secure mobility** with portable OTP key fob that can be carried by users wherever business takes them
- **Cost effective** with effortless back-end configuration, low maintenance, and long-lasting battery life
- **Facilitates compliance** with privacy and industry regulations

Features

- OTP authentication device with LCD display, battery, and OTP generation button
- Time-sync and event-based configuration options
- Support for OATH TOTP and OATH HOTP protocols
- Field programmable for enhanced security
- Standard support for RADIUS OTP

eToken PASS is a compact and portable one-time password (OTP), strong authentication device that allows organizations to conveniently and effectively establish OTP-based secure access to network resources, SaaS cloud applications, and online services.

Providing a Foundation for Your Business Today and Tomorrow

eToken PASS is a versatile solution designed to meet the diverse needs of users whose requirements may vary significantly across the organization. It provides a strong and scalable foundation for increasing employee productivity and complying with industry privacy and security regulations. In addition, eToken PASS is field programmable, enabling organizations to maintain control over their own OTP security data.

Flexible and Scalable Management

eToken PASS is available with a range of SafeNet authentication platforms:

- **SafeNet Authentication Service**

SafeNet Authentication Service delivers multi-tenant, fully automated (OTP) strong authentication-as-a-service, with no infrastructure required. Offering Federated Single Sign-On (FSSO) with native identity federation, and quick deployment and setup, SafeNet Authentication Service delivers one-time-password authentication via hardware, software, mobile, and out-of-band tokens.

Leveraging the scalability and flexibility of automated workflows delivered from the cloud, SafeNet Authentication Service protects everything from SaaS and on-premises applications to networks, users, and devices, while reducing IT management overhead.

- **SafeNet Authentication Manager**

SafeNet Authentication Manager is a comprehensive authentication server that provides a single point of management for diverse authentication methods, including certificate-based, OTP, OOB, and context-based authentication, allowing organizations to address varying use cases, assurance levels, and threat vectors.

Offering rich customizable step-up authentication policies, and enabling implementation of a future-ready strong authentication strategy, SafeNet Authentication Manager secures local and remote access to corporate resources—on-premises or in the cloud, protecting authentication data with a hardware-based root of trust.

- **SafeNet Authentication Manager Express**

eToken PASS with SafeNet Authentication Manager Express, SafeNet’s simple to deploy and easy-to-use authentication package, lets small and large businesses alike set up secure remote access in a matter of minutes.

SafeNet Authentication Manager Express is an integrated all-in-one solution pack that includes management software, eToken PASS authenticators, and support.

SafeNet’s authentication management solutions offer seamless integration with Microsoft environments and make it simple-to-deploy two-factor authentication for your IT ecosystem, including VPNs, SaaS applications, Citrix applications, Web applications, Webmail, and Outlook Web Access.

Technical Specifications

OTP security algorithm	OATH compliant (HOTP and TOTP available in SHA-1 and SHA-256)
OTP length	6 characters
OTP character type	Digits
Battery lifetime	For event-based OTPs: 7 years For time-synched OTPs: 5 years
Casing	Body: Hard molded plastic Security feature: Tamper evident Customizable elements: Casing color, logo printing, serial number printing
Operating temperature	0°C to 70°C (32°F to 158°F)
Storage temperature	-40°C to 85°C (-40°F to 185°F)
Humidity rating	0°C to 100% without condensation

Next-Generation Authentication from SafeNet

SafeNet offers next-generation authentication solutions that protect identities and ensure that individuals are who they claim to be. With automated administration, and user and token management, SafeNet’s solutions support the broadest range of authentication methods and extend identities beyond the enterprise with cloud SSO capabilities.

SafeNet’s solutions streamline authentication across an organization’s IT ecosystem with unified, centrally managed access policies—managed from one authentication back end, delivered in the cloud or on premises.
