

## Software Sensor

# Extraordinary network insight, anywhere

Corelight's new Software Sensor was created for maximum versatility. It goes where our physical sensors can't, such as containers and customer-provided hardware.

### **Works with your existing infrastructure**

Deploy Corelight Sensors on any Linux platform and within containers.

### **Unique value only available from Corelight**

Gain actionable security insights using the Encrypted Traffic Collection in addition to community-sourced packages.

### **Extract files and reduce SIEM data volume**

Capture files from network traffic at high speed, and lower data volume into your SIEM by reducing data of minimal value.

Corelight's Software Sensor delivers network traffic insights across a range of environments:

- Low bandwidth links
- In branch locations
- On manufacturing floors
- In remote offices

# Specifications

## Best-in-class Zeek deployment:

- Corelight's platform in a lightweight (< 60MB) software binary
- Enterprise support, maintenance, and software updates
- Built-in Zeek detection, monitoring, and enrichment packages
- Capacity-based licensing model for deployment flexibility
- Zeek log export to Splunk, Kafka, Syslog, JSON, REDIS, and SFTP
- High performance and efficient file extraction
- Comprehensive REST API for configuration and monitoring
- World-class support from the definitive Zeek experts

## Minimum system requirements

- Any 64-bit Linux distribution

## Scalable across a range of reference configurations:

Nominal capacity	vCPUs	RAM (GB)	Workers
500 Mbps	2	8	1
1 Gbps	4	16	2
2 Gbps	8	32	4
4 Gbps	16	64	8
8 Gbps	32	128	16

Defenders have always sought the high ground in order to see farther and turn back attacks. Corelight delivers a commanding view of your network so you can outsmart and outlast adversaries. We capture, interpret, and connect the data that means everything to defenders.
