

Flashpoint Cyber Threat Intelligence

Better intelligence outcomes for Security Operations and Cyber Intelligence Teams

Understand your organizational risk and make informed decisions using Flashpoint Cyber Threat Intelligence (CTI). Flashpoint CTI draws intelligence from across the deep, dark, and surface web, to provide visibility into your unique threat landscape so you can focus on the threats that matter, make smarter decisions, and protect your people, places and assets.

With Flashpoint CTI, you're able to understand active and potential threats with a big picture view of your threat landscape through a combination of raw collections, analytics, human-powered intelligence, and advanced search.

Flashpoint CTI benefits

- ✓ Enhance your intelligence capabilities with support from best-in-class intelligence experts
- ✓ Focus on where to proactively strengthen defenses, rather than reacting to incidents as they arise
- ✓ Detect and monitor threats that are targeting your organization and industry early on
- ✓ Investigate and respond to potential threats to manage their impacts to your business
- ✓ Make faster and more accurate security decisions by evaluating threats and risks using threat intelligence
- ✓ Increase collaboration across departments by sharing the right information at the right time

Key features

INTUITIVE ADVANCED SEARCH

Advanced search capabilities reveal valuable conversations and context quickly and intuitively. Search across the vast landscape of raw collections, including text, images, videos, and finished intelligence, to find the information you need to connect the dots between events.

FINISHED INTELLIGENCE REPORTS

Finished Intelligence reports give timely, actionable information about the latest cyber events. The news-style reports provide details on geopolitical regions, major cybercriminal techniques, ongoing incidents, and threat actors and groups to provide a full understanding of what's changing in today's security landscape.

DATA-DRIVEN DASHBOARDS

Dashboards provide a comprehensive view of your assets e.g, organization, and domains measured against our intelligence so you can see what stands out and easily dive into the details to explore what's happening.

SELF-SERVICE COLLABORATION

Collaborate with our expert analysts to help field questions and conduct research inside closed illicit communities with our Request for Information (RFI) portal. Request, read, share files and track RFI hours directly inside the platform.

VULNERABILITY INTELLIGENCE

Gain insights into publicly available CVEs, as well as the ~97K vulnerabilities not covered by the CVE/NVD, to see how threat actors are exploiting these vulnerabilities inside actor communications, message boards and more.
